## *Introduction*

The CRP 129 EVO is an intelligent and networkable diagnostic tool based on Android. It has the OBD full functions that best meets the entry-level market demand for passenger cars, as well as the basic diagnostic functions of the four basic systems: engine, automatic transmission, ABS and SRS. Besides, the CRP 129 EVO also has the most commonly used service reset functions, such as oil lamp reset, electronic brake pad reset, battery reset, steering angle reset, throttle matching, diesel particular filter reset and injector programming.

Compared with the previous CRP, it has more features. The software can be updated from device via Wifi directly, no need to connect to PC update tool. It supports the feedback function which helps the diagnostic problem to be solved quickly.
