# Trailer Tester

A COMPACT AND MOBILE UNIT FOR INCREASED EFFICIENCY

**auto-com**

# The mobile solution for signal and lighting testing on trucks and trailers.

## TRAILER TESTER: IDEAL FOR BOTH WORKSHOPS AND SERVICE VEHICLES

- > **Testing of trailer lighting | 12V, 24V**  
All trailer lighting is visually controlled with the included remote control. Faulty lights are immediately identified, and the error code shown on the LCD display.
- > **Testing of the tractor trucks outgoing lighting signals | 24V**  
The outgoing lighting signals of the truck are individually controlled.
- > **PIN control of bogie lift function**  
Possibility to control the lift functions of the trailer's third axle.
- > **Stable power supply | 12V, 24V**  
To assure a correct diagnosis of the trailer modulator, Autocom Trailer Tester supplies the trailer electronics with a stable power supply.

Lighting features are easily controlled with remote control.

- SMART PLUGS WITH CABLE IDENTIFIER**
  - X1 - Stable power supply for reliable trailer diagnosis
  - X2 - Test of outbound lighting on trailer and truck
  - X3 - Also works with 12 Volt systems
- BRAKE FAILURE INDICATOR**
