# **Operating Instructions for Key Programmer**

# **Product requirements**

1. Super chip and key programmer + key \* 4 set

Product Number	431	Picture	
307110096	Key Programmer		
307110149	Key programmer + key * 4 set	LAUNCH	

**Introduction to the functions of super chips:** Support the conversion of most car model chip types, and support separate matching to achieve vehicle startup. Support chips of the 8A, 8C, 8E, 4C, 4D, 4E, 48, 7935, 7936, 7938, 7939, 11/12/13 types.

# Usage scenario:

### Method of using super chips

1. Enter the menu [Set type of super chip] to generate.

**Key programmer + key \* 4 set includes:** key programmer, USB to TYPEC, LS Nissan (smart card, 4 buttons) -01, LN Peugeot DS (folding 3 buttons) -01, LK Volkswagen remote (folding 3 buttons) -01, LE Ford super remote (folding 4 buttons) -01

**Key programmer:** Identify car key chips and generate various types of chip models from super remotes, read the remote control frequency of car keys, and generate remote control devices for different car models from various types of super remotes.

USB to TYPEC connector: device to key programmer

LS Nissan (smart card, 4 buttons) -01, LN Peugeot DS (folding 3 buttons) -01, LK Volkswagen remote (folding 3 buttons) -01, LE Ford super remote (folding 4 buttons) -01 super remote: One click start smart key models and use LS series Nissan super remotes to generate corresponding keys. For car models with electronic chip keys or the 11/12/13/7936/7937/7947/7946 chips, use the LN series DS super remote. For car models without electronic chip keys or car models with the 46, 48, 4D/70, 83, 8A/H, G, 4E, 11/12/13/4C, 42, 33, 47, 8C, 8C chips, use the LE series Ford super remotes or use the LK series VW remotes with super chips. For car models without anti-theft chips, use the LK series VW remotes.

#### Method of using the LE Ford super remotes:

1. Enter the [Vehicle Remote] menu and select the corresponding available super remote to generate.
