

Diagnostics for trailers.

autoM.com[®]

TRUCKS

TRAILER

APPROVED OEM COMPATIBILITY

With TRAILER comes the possibility to perform brand-specific diagnosis on Haldex, Knorr and WABCO systems. With access to OEM-level data from Haldex and WABCO there are all possibilities for a complete diagnosis, including programming and calibration functions of new control units [ECU].

With the TRAILER software, it is easy to communicate with a trailer's ECU. Read and erase possible fault codes on a trailer with original data. With TRAILER you can read ECU codes in order to quickly determine where an error is located.

THE TRAILER SOFTWARE

Quick access to original Haldex Trailer Diagnostics and the original WABCO System Diagnostics in a single system. TRAILER software provide true multitasking for convenient and even more efficient diagnostics. The simultaneous display of various functions and items of information in up to four windows, makes diagnostics more transparent and saves valuable time

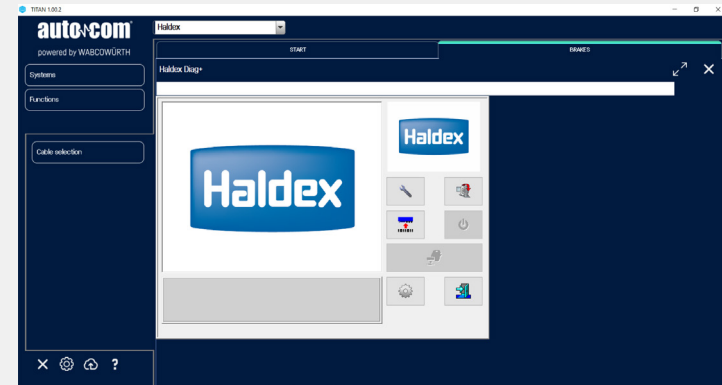

TITAN is compatible with both TRUCKS and TRAILER software.

HEAVY VEHICLE DIAGNOSTICS SOLUTION

Autocom TITAN is an advanced diagnostic tool. It is developed to give workshops the opportunity to a faster, simpler and more reliable vehicle diagnosis on trucks, trailers and buses.

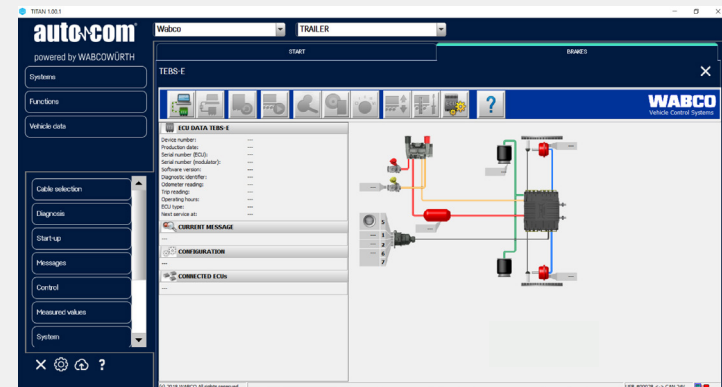

TITAN contains powerful processors and components specifically chosen in order to handle new stringent requirements for the flow of information.

- Robust surface
- Multicolour indicator rim
- WiFi/Bluetooth/USB
- LED in connector
- Replaceable cable

HALDEX OEM

With HALDEX original data, you can perform an ECU parameter setting, fault code read-out and deletion, as well as verification via end-of-line testing.

WABCO OEM

With a diagnostic software PIN code from WABCO, you can perform functionality on a ECU such as EBS/ABS/ECAS parameter setting, as well as calibration of distance and pressure sensors.

FEATURES IN THE TRAILER SOFTWARE:

- General status of the ECU
- Read out and erase fault codes
- Service light reset
- Read out and change the ECU's configuration
- Perform EOL tests
- Generate reports of EOL test and ECU status

WABCO ACADEMY PRODUCT TRAINING PROGRAM

With the Autocom PIN code you can only perform basic functionality on a trailer. To be able to perform advanced diagnostics you need to attend the WABCO Academy product training program. After a successful training, you get access to the diagnostic software PIN code which will activate all functionalities for WABCO in TRAILER.
